

I know this isn't quite the right place to send this, but your electronic system is not very "user friendly". Hopefully this will get routed to the right place.

As a consumer of telephone service I would like to ask the agency to do everything in its power to insure that wireless number portability is rapidly adopted. I do not believe it is in the consumers best interest to allow any further delay in implementation. Please do not grant any further extensions to the implementation, especially do not consider Verizon's request to kill the implementation of wireless number portability. I believe that portability is the best tool to insure competition and improve service. With portability a consumer can easily move to a carrier with the best service thus insuring companies will improve their service, or the service provider will risk losing customers.
